

Accurate Data, On Time with High Touch

Smithers is focused on providing analytical and microbiology testing services to cultivators and manufacturers in Illinois.

Smithers Cannabis Testing labs offer services using leading scientific expertise, state-of-the-art instrumentation, and easy-to-use client portals that provide clients with trustworthy data, access to experts, and rapid results. Compliance testing to state requirements for cannabinoid potency, pesticides, heavy metals, residual solvents, microbiological contaminants, and mycotoxins are performed at our testing labs.

Smithers has been in the independent testing business for nearly 100 years in a variety of industries. Our commitment is to be the cannabis testing lab you can rely on for timely, quality, compliant product information.
